

Report on “China-Latin American Youth Responding to Global Challenges —— 2024 Poverty Alleviation Challenge” Program

Tsinghua University Latin America Center
Center for China-Latin America Management Studies, SEM,
Tsinghua University

Time: November 1st, 2024

I. Background and significance of the event

Poverty alleviation is a universal challenge for developing countries and a common challenge for the whole world. Under the severe situation where the world is facing a major change that has not been seen in a century, poverty alleviation has become a common challenge that the world needs to address quickly. General Secretary of the Chinese Communist Party Xi Jinping has made a number of speeches at different levels of meetings on global efforts to address the challenges of poverty alleviation. As early as 2015, at the High-level Forum on Poverty Alleviation and Development, he called for “building a community of shared future without poverty and promoting the global poverty alleviation process and international cooperation”. In recent years, China-Latin America relations have entered a new period of comprehensive and rapid development, and General Secretary Xi Jinping and Latin American heads of state have emphasized the importance of China-Latin America cooperation in poverty alleviation on a number of occasions. 2023, when Brazilian President Lula visited China, he mentioned that “Brazil hopes to help solve poverty alleviation and other problems through deepening cooperation with China”, and after the meeting, General Secretary Xi Jinping and Lula signed a number of bilateral cooperation documents in trade and investment, poverty alleviation and other areas.

Young people represent the future of the country. As students of Tsinghua University, one of China's top universities, they should have the courage and responsibility to actively face and take on the problems and challenges of the real world. As General Secretary Xi Jinping expects the younger generation, “The friendship between countries depends on the friendship between people, and the friendship between people should start with the youth. We must deepen exchanges and mutual learning and build a spiritual home of harmony and diversity with an inclusive mind.”

In view of this, this project brings together young people from the top universities in China, Chile and Brazil to jointly tackle the global problem of “poverty”. Although the students come from different countries, cultures and majors, they come together through the mission of “poverty reduction”. In the form of poverty reduction competition, they observe the phenomenon of “poverty” in different backgrounds, and based on their own professional perspectives, they visit the field to jointly discuss the conditions for achieving poverty reduction, learn from each other, and finally form solutions in various professional fields. While deeply understanding the poverty problem in the real world, we have achieved cultural exchange and mutual learning among civilizations, enhanced and cultivated the global competence of young students, and worked hard to implement the General Secretary's expectations for young people: “We must join hands with the youth of the world and promote world peace and development with the vitality of youth!”

Tsinghua University, as a top university with international influence, has the responsibility and obligation to contribute to the global poverty reduction cause and promote international youth poverty reduction cooperation with its university influence, extensive cooperation, scientific research expertise, and innovative experience. Tsinghua University Latin America Center and Tsinghua University School of Economics and Management China-Latin America Management Research Center, based on their many years of research and operation experience in Latin America since their establishment, in collaboration with Center for Global Competence Development at Tsinghua University and Latin American university partners to initiate and jointly carry out the 2024 Poverty Alleviation Challenge. We believe that the “China-Latin America Youth Responding to Global Challenges -2024 Poverty Alleviation Challenge” has broad and profound significance:

>For China, this program will help to demonstrate China's achievements and experiences in poverty alleviation, tell the story of China's poverty alleviation to a wider range of countries, and contribute wisdom to the endeavor of poverty alleviation in Latin America and developing countries around the world. At the same time, the “2024 Poverty Alleviation Challenge” is initiated by Tsinghua University, based on typical Latin American countries, and gradually radiating to the Latin American region. It is the first activity in Chinese universities that focuses on the theme of “poverty reduction” and is presented in the form of “poverty reduction case and innovation program competition + academic forum + field research”. It provides a high-quality practical cross-cultural exchange platform for Chinese and Latin American students, gathering a wide range of government, enterprise, academic and research resources, and involving experts, scholars and corporate talents from many countries in the fields of poverty reduction and international cooperation. It has the pioneering value and promotion significance in the China-Latin America region.

>For China-Latin America cooperation, the “2024 Poverty Alleviation Challenge” focuses on “youth power”, so that young people from different universities and specialties in China and Latin America can learn from each other and complement each other's strengths and weaknesses in specific and deepened exchanges and cooperation on the theme of poverty alleviation, and jointly help disseminate the poverty alleviation experiences of China and Latin America and improve the effectiveness of poverty alleviation; this kind of concrete civilization mutual learning will certainly help promote friendly relations between China and Latin America, and is a sustainable project centered on the long-term goals of China-Latin America poverty reduction cooperation;

>For young people,who are the future of all countries and whose participation will inject new vitality into the poverty reduction endeavor,the"2024 Poverty Alleviation Challenge"can professionally empower Chinese and Latin American students to meet the challenges of poverty reduction,enhance their sense of social responsibility and global vision from the perspective of value cultivation,and help to implement and promote young student's high-quality projects on the ground.It is a comprehensive improvement process from learning,thinking and practice to the implementation of results.

III. Competition Information

> Organizer:

Tsinghua University (China)

Pontifical Catholic University of Chile (Chile)

Federal University of Rio de Janeiro (Brazil)

> Supporting Organizations:

Ministry of Foreign Affairs of the People's Republic of China

Embassy of Chile in China

Chinese Embassy in Chile

Chinese Embassy in Brazil Embassy of Brazil in China

The event is also authorized to use the logo of the "50th Anniversary of Diplomatic Relations between China and Brazil" event.

> Participating universities:

Chinese Universities: Tsinghua University

Chilean Universities: Pontifical Catholic University of Chile, University of Chile,
University of Santiago, Technical University Federico Santa Maria

Brazilian Universities: Federal University of Rio de Janeiro

> Supporting organization for collaborative dialogues, case studies and field research:

Field research/case study: CGE

Field research/case studies: Aguas do Rio, Brazilian Sanitation company

Field research/case study: State Grid Holding Brazil China

Rural Development Foundation

Field research/case study: China's Top 100 Beautiful Villages, Nanyu Village,
Laishui, Hebei

Forum Support: Lecture by Mr. Wu Peng, Director of International Development,
on "China's Experience in Poverty Alleviation".

International Poverty Reduction Center in China

Cooperation Dialogue: The 4th China-Latin America Poverty Reduction and
Development Forum, Weifang, Shandong

III. Six highlights of the competition: Gather wisdom to jointly meet the global poverty reduction challenge

Competition organization: Cross-cultural and cross-disciplinary, Chinese and Latin American youth work together to meet global challenges

Three Countries: China, Chile and Brazil, with two stages: "Preliminary Round" and "Cross-country Final Round"

Students from 14 countries: China, Chile, Brazil, Indonesia, Malaysia, Japan, Bangladesh, Russia, France, Germany, Finland, Venezuela, Colombia, Barbados, etc., with a broad reach across Latin America and the world. Interdisciplinary: Tsinghua University alone has more than 16 participating departments, with majors such as Marxist theory, economics and finance, industrial engineering, journalism and communication, and law.

Schedule for the preliminary rounds of the three countries

China	Brazi	Chile
April 12th, Kick off May 6th, icebreaker and team teaming May 7th to 10th, proposal preparation May 11h, mentoring and presentation May 12th, pitch, and award ceremony	June 7th Kick of July 8th, presentation preliminary proposal July 9th to 23d, mentoring and proposal improvement July 24th, pitch, and results announcement	May 23rd, Kick off Jun 8th to July 15h, teaming, proposal preparation and online mentoring July 15h to 17h, submit presentation and video July 18h, announce first round results

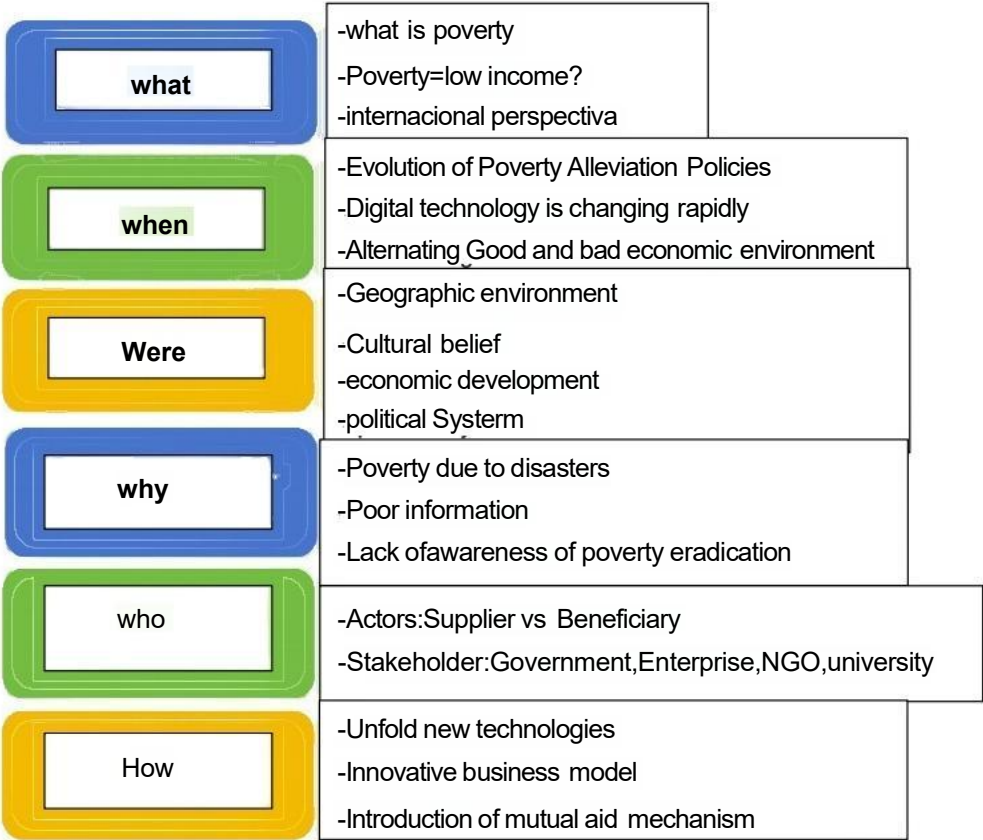

Finals Schedule

>Originality Analysis Tools:Tsinghua Poverty Alleviation Toolkit 5W1H+

Professor Chen Taotao,Director of the Tsinghua Latin America Center,led a research team to develop an original tool,the “Tsinghua Poverty Alleviation Toolbox 5W1H+”,specifically for the““2024 Poverty Alleviation Challenge”based on many years of scientific research in the field of Latin American development and China-Latin America cooperation,and valuable

experience from multiple field surveys in Latin America.It built an analysis framework from four dimensions:“What”,“When”,“Where”and “Why”,focusing on the two major issues of “Who”and “How”,helping young people to deeply analyze poverty reduction scenarios, explore the logic of the poverty reduction process,and formulate practical solutions.It directly supports the research on poverty reduction issues between China and Latin America, the reference to country experiences,and the discussion of poverty reduction proposals, further enhancing the scientific and professionalism of the program.

Originality Analysis Tools

Forum:Bringing together cross-sectoral parties,gathering collective wisdom for a common response

This competition is a rare cross-field,cross-disciplinary,and cross-cultural exchange event that addresses the issue of poverty reduction,which is of common international concern.It has attracted widespread attention from governments,universities, enterprises and other sectors of society in the three countries.

The Poverty Alleviation Forum for the Chile Competition featured Prof.Francisco Gallego,Department of Economics,Pontifical Catholic University of Chile;Prof.Karla González,School of Social Work,Pontifical Catholic University of Chile;Prof.Maria Luisa Méndez,Professor at the Institute for Urban and Regional Studies and Director of the Center for Social Conflict and Cohesion;Prof.Liu Jian,Professor of the Department of Urban and Rural Planning at the School of Architecture of Tsinghua University;Prof. Professor Juan Carlos Ruiz,School of Social Work of UTEM;Raquel Santos,Officer of the Social Development Division of the Economic Commission for Latin America and the Caribbean of the United Nations;Camila Bravo,Manager of the Excellence Center of the company CGE;Carolina León,Director of the Centralized Services Sector; Magdalena Valdés,Director of the América Solidaria,and other poverty reduction experts from China and Chile invarious fields.

The competition in Chile

The Poverty Reduction Forum in Brazil invited Professor Liu Jian from the Department of Urban and Rural Planning, School of Architecture, Tsinghua University; Pedro Fandino from the Brazilian Institute for Science and Technology Policy, Strategy and Development (IBPESD); Sun Yanping, Chinese Director of the Confucius Institute at the Catholic University of Rio (UCR); Thereza Cristina de Lacerda Paiva, Minister of Science and Technology of Rio de Janeiro; Flavio Pinto, Legal Manager of CNOOC Brazil; and Paulo Protasio from the Sustainable Development Administration of the State of Rio de Janeiro, and other poverty reduction specialists from China and Brazil discussed poverty reduction strategies in the seminar.

Brazil Competition

>Mentoring:Academics+Businesses World Working Together to Support Young

Learners

The preliminary round at Tsinghua University and the final rounds in Chile and Brazil have attracted the active participation of experts from all parties, who have provided professional guidance to young students and helped them polish their competition proposals.

The Tsinghua competition invited Xiao Ruxin, Director of International Cooperation and Research Department, SME Development Promotion Center of Ministry of Industry and Information Technology; Yan Qiang, Deputy Secretary General of AI Big Data Committee of Tsinghua Alumni Association; Li Angda, Deputy Director and Secretary General of Tsinghua Alumni Economic Research Institute and Chairman of Singularity Public Welfare; Yao Yinan, Manager of Inclusive Finance Division, Bank of China; He Lishuai, Head of BMW's Automotive Finance Innovation Platform; Liu Jian, Professor, Tsinghua School of Architecture; Liu Yishi, Associate Professor, Tsinghua School of Architecture; and Yu Ming, Associate Professor, Tsinghua Department of Industrial Engineering to provide mentoring to the students.

Expert mentoring

Field trips for poverty reduction: enhancing youth understanding and awareness of poverty alleviation

State Grid Chile/CGE supported more than 100 students and professors to visit Cardenal Caro de Buin High School to learn about the “Illuminating” social responsibility program carried out by State Grid Chile/CGE in Buin. The on-site research provided faculty members and students with an excellent paradigm on how to incorporate the fulfillment of social responsibilities for poverty reduction into corporate

operations, and also laid a foundation for contestants to continuously polish and improve their respective competition proposals.

Mr. Wu Peng, Director of the International Development Department of the China Foundation for Rural Development, gave a lecture on “China's Experience in Poverty Reduction” to the young students, and at the same time, provided the faculty and students with a valuable opportunity to visit the “Top 100 Examples of China's Beautiful Villages: Nanyu Village” in Laishui, Hebei Province, to further enhance the participants' understanding of China's poverty reduction.

Agua do Rio, a Brazilian sanitation company, supported more than 50 students and faculty members to visit the site, providing them with valuable insights into integrating poverty reduction social responsibility into their business strategies, and providing a realistic reference for the development of the contestants' proposals.

The Center for International Poverty Reduction (CIAPR) invited Professor Chen Taotao, the professor-in-charge of the program and Director of the Tsinghua University Latin America Center, to participate in the 4th China-Latin America Forum on Poverty Reduction and Development in Weifang, Shandong Province, as a guest speaker, to clarify for the domestic and international attendees the value and significance of the competition as an innovative poverty reduction strategy mainly based on the university.

Development of a course entitled “China-Latin America Youth Responding to Global Challenges”: a joint multinational course open to enrich the exchange of experiences in poverty reduction and substantially promote China-Latin America youth cooperation in poverty reduction.

At the beginning of the preparation of this competition, Professor Chen Taotao, the responsible professor of this competition and the director of the Tsinghua University

Latin America Center,opened a course on campus titled “China-Latin America Youth Responding to Global Challenges”to improve young people's understanding of and ability to respond to the challenges of poverty reduction in China and Latin America through professional theoretical learning,competition participation and other tools.

At present,it has reached a willingness to cooperate with Latin American universities such as the Pontifical Catholic University of Chile and the Federal University of Rio de Janeiro on this course.Tsinghua Latin America Center is committed to promoting the course to Latin American countries and encouraging more students from Chile,Brazil and other Latin American countries to participate.Next,the course platform will introduce top poverty reduction experts from academia,industry,and politics in China and Latin America to furtherenhance the professional transnational vision.Furthermore, cross-border teaming of youth will be carried out throughout the competition to stimulate more in-depth exchanges and cooperation between young people from China and Latin America.

IV. Winning Teams

Chile Final(August 20-22)

The finalists presented innovative approaches and diversified solutions to poverty from the perspectives of economic policy,education,agriculture,sustainable ecology,industrial development,digital technology,ageing,inclusive finance,etc.,combining professional disciplines and cross-cultural perspectives,and discussed the feasibility of their projects and the transferability of poverty reduction experiences with experts.

The student team“**EcoVida Quintero App**”won the competition.The project aims to address ecological poverty as well as air and nutrient pollution in the Bay of Quintero,Chile,through the creation of a sustainable development platform to help sustain ecological poverty alleviation efforts.

Tsinghua University's team on“Empowering Chilean fisheries and aquaculture through inclusive finance”,which designed a financial ecosystem to enhance the sustainable development

of micro,small and medium-sized enterprises (MSMEs)and promote gender equality,won the silver award.

The team from Chile,“**Into the Elderly:A Project to Reduce Loneliness among the Elderly**”, won both the Bronze Award and the audience award for the most popular project.By designing a community center to provide activities aimed at integrating older persons into society,the team sought to create a support network among neighbors,thereby increasing the social inclusion of older persons.

Successful conclusion of the Chilean final

Brazil Final(August 15-17)

The finalist teams addressed poverty reduction from the perspectives of geothermal energy utilization,urban agriculture,vocational skills enhancement,and population health improvement from diverse,interdisciplinary,and intercultural standpoints,and discussed the possibilities of implementation with experts

Tsinghua University's“**Solar Lighting**”team won the championship after the competition.The proposal identified the problem of electricity and lighting in poor areas of Brazil,explored the deployment of solar lighting and charging stations in poor communities in Brazil,effectively improving the community's ability to cope with disasters,and explored China's ability to supply lighting and charging equipment that can serve the illumination in poor areas of Brazil.It is worth

mentioning that the contestants of this project are composed of both Chinese and Brazilian students, and the contestants have already developed the technology and products, which has greatly increased the possibility of landing on the ground.

The **“Green Revitalization of Slums”** team from the Federal University of Rio, Brazil, won the Silver Prize for its urban agriculture project on collective vegetable gardens in poor communities, which not only improves community food self-sufficiency but also promotes environmental sustainability. The program is closely aligned with the Brazilian context demonstrating the high applicability and feasibility of the project. It is also worth noting that the project is already in operation and has achieved significant results, with team members working closely with community members to overcome the challenges of water resource management and technical training, and with the establishment of mechanisms for community participation to ensure the long-term sustainability of the project, which is making a real difference in the lives of people in the slum communities.

Successful conclusion of the Brazilian final

V. Achievements and Prospects

1.Achievements

This competition has enhanced the ability of Chinese and Latin American youth to respond to the challenges of global poverty reduction and realized mutual learning and sharing of experiences and programs in cross-cultural communication. At the same time, it has attracted the participation of a wide range of government, enterprises, academics and researchers, which has led to the cross-border communication and integration of poverty reduction experiences and proposals and has brought more resources and possibilities for the implementation of the project. Through the cooperation led by Tsinghua University with universities in Chile, Brazil and other Latin American countries, the social image and influence of Chinese universities in Latin American countries have been improved, and the important instructions of General Secretary Xi Jinping on global cooperation in poverty reduction and international cooperation of universities have been effectively put into practice. The poverty reduction experiences and proposals polished in the competition triggered active thinking and exploration among all the participants, which is an effective attempt to empower global poverty reduction initiatives.

2.Prospects

Although the main activities of 2024 Challenge have ended, the advancement is still ongoing.

This competition provides valuable cross-border exchange opportunities for young students.

Among the winning teams of this competition, the six winning teams from Tsinghua University received financial support from the International Office of Tsinghua University, Tsinghua University Education Foundation, and Tsinghua University Latin America Center, and have already traveled to Chile and Brazil to participate in the finals in August of this year; the two winning teams from Chilean universities will receive full support from the State Grid Chile/CGE, and Pontifical Catholic University of Chile, and will travel to China in January 2025 for exchanges.

Looking to the future,Tsinghua University will continue to carry out the“Poverty Alleviation Challenge”with high quality together with its Latin American university partners.We will further develop the“China-Latin America Youth Responding to Global Challenges”joint course with our Chilean and Brazilian university partners,and effectively expand and strengthen the cross-cultural communication channels for poverty reduction experience and exploration.

By summarizing the valuable experience of this competition,optimizing the process,and improving the quality and influence of the competition;the core research team of Tsinghua University under the leadership of Prof.Chen Taotao will work together with the Chinese government,Chinese companies investing in Latin America,and outstanding local companies in Latin America to further study domestic and international cases of poverty reduction as well as to build up a demonstration basefor best practices in poverty reduction;

At the same time,we will further increase the visibility and participation of the program through online and offline multi-channel publicity to attract more outstanding students at home and abroad to participate in the program;establish cooperative relationships with domestic and foreign enterprises,universities,and scientific research institutions to jointly promote the transformation and application of the results of the Challenge;and,in the course of carrying out the activities from year to year,we will continue to iterate and polish the best proposals,and put them on the ground for implementation and pay attention to the effectiveness of the project so as to contribute to the global poverty alleviation endeavor.

Through the above planning,we are confident that the “China-Latin America Youth Responding to Global Challenges”will continue to achieve fruitful results,cultivate more outstanding talents for China and the LAC region,and contribute to the global poverty alleviation efforts.

We would like to express our sincere gratitude once again for your perusal and support!

“2024减贫营”巴西决赛落幕中拉青年携手应对全球挑战

新华网客户端202408-2112523 @31. 万

新华社里约热内卢8月20日电(记者王天耶)日前,“中拉青年应对全球挑战——2024减贫营”巴西赛区决赛在里约热内卢落幕,来自中国清华大学与巴西高校的50余名师生参加决赛,结合学科专业与跨文化视角展示了应对贫困问题的创新手段和多样化策略

参赛小组围绕经济政策、数字技术、公共卫生、能源与环境可持续性、农业、灾害应对、教育与职业发展等议题进行项目汇报。来自清华大学的参赛队伍“太阳能哨兵”获得金奖,该团队聚焦巴西贫困社区电力供应不稳定问题,旨在通过安装太阳能紧急照明灯和USB充电站,提升社区应对自然灾害和停电的能力。
